INTERSHIPS AND PROJECTS

Projects **Crop price prediction using Machine learning** (Duration February 2024 -
July 2024)
It is basically a Machine learning model which is used to predict the price of
crops in the future which makes the farmers not to lose their time and money
on other crops which are not in demand.
Skills used - Python, Javascript
Safety helmet for Mining workers. (Duration March 2023 - August 2023)
It is a hardware project in which the components are integrated to the safety
helmets of workers in mining industries by using these helmets the hardware
components detects the harmful gases near the workers and alert them to
leave the mines for their safety. And we also integrated Alcohol detector to the
helmet to detect if the worker took alcohol.
Skills used - Python
